

Powering utility applications with
Open Standards
Including IP and 802.15.4/Zigbee

WebGate® TotalPoint™ Meter Interface Module Integrated with the Sensus™ iCON™ Residential Meter

ZigBee-based Mesh Networking Standards

WebGate TotalPoint Meter Interface Modules (MIMs) utilize IEEE 802.15.4 and ZigBee wireless networking standards to create a robust mesh network specifically designed to support the advanced metering and load management applications for next generation AMI programs. Located under-the-glass of the Sensus iCON, TotalPoint MIM's operate as full function ZigBee devices creating a two-way mesh network with automatic routing and self healing properties.

Advanced Metering and Load Management Applications

Total Point MIMs enable not only traditional electric metering applications, such as automated retrieval of kWh consumption, billing and interval data, and tamper detection, but also offers a wide range of options targeted at other utility applications. Voltage monitoring, remote disconnect and reconnect, and advanced load management through remote thermostat control are all supported by the WebGate TotalPoint System. WebGate MIMs also enable connections to water and gas meters by short-hop wireless communication achieving multi-utility AMI with a single network.

Data collection and Command & Control

Data acquired by TotalPoint MIMs is collected by strategically positioned TotalPoint Gateways and then backhauled by any available IP-based network. All network management and command and control functionality is seamlessly handled muNet's WebBot™ Central Control Web-based software.

WebGate TotalPoint Meter
Interface Module

WebGate TotalPoint MIM Features

- Integrated under the glass of the Sensus iCON meter
- Full support for IEEE 802.15.4 and ZigBee protocols
- Acquires time stamped interval metering data
- Stores data in non-volatile memory
- Full two-way communication capability
- Instant on-demand reading capability
- Demand information
- Optional features:
 - Records data from water and gas meters via wireless connections
 - Controls a 200 Amp power disconnect switch
 - Advanced load management via remote thermostat control
- Collects voltage measurements

Metrology

Family of Sensus iCON residential meters

- Accuracy exceeds ANSI C12.20 (Class 0.2)
- kWh energy measurement, net metering, voltage monitoring
- Inversion proof
- ANSI compliance in performance and design

WebGate TotalPoint MIM Specifications

Physical Specifications	ZigBee Specifications
<p>Meter Height</p> <ul style="list-style-type: none"> ▪ 3" without remote disconnect option ▪ 6" with remote disconnect option 	<p>RF Characteristics</p> <ul style="list-style-type: none"> ▪ Data Rate: 250kbps ▪ Frequency: 2400 MHz to 2483.5 MHz, 16-5 MHz channels ▪ RX Sensitivity: -95 dBm nominal ▪ Adj Channel Rejection (15.4): >35db ▪ Alt Channel Rejection (15.4): >40db ▪ 802.11g Rejection (+10/-10 MHz): >40db ▪ TX Power: -32dbm to +20dbm (100mW)
